**Vacaville, CA – April 26, 2004** – Aanko Technologies is pleased to announce that they have entered into a Strategic Marketing Agreement with Homeland Radiological Services of San Diego, California.

Aanko Technologies Inc. is a California Certified Minority and Veteran-owned Small Business Safety and Security Firm founded in 1997. They provide safety, security and bioterrorism consulting and training solutions for government, industrial, corporate and healthcare clients to meet homeland security, regulatory and business needs, from offices in Vacaville, Los Angeles and New York.

Homeland Radiological Services (HRS) offers full service radiological awareness, recognition, safety, training, protection and regulatory compliance solutions for Federal, State and Local Governmental agencies and Public / Private firms. HRS specializes in services that serve to protect against malicious or terrorist threats of radiological concern.

Working together with Aanko Technologies, this partnership intends to:

- Provide a radiological protection component to the core competencies of safety, security and bioterrorism offered by Aanko Technologies
- Provide regulatory compliance services and expanded training opportunities to Aanko and HRS clients on a global scale
- Implement cost-effective strategies that blend the core competencies of both companies

“We are very pleased to be working with Aanko Technologies in combining our services to bring additional expertise to our clients” said Brian Czajkowski, Managing Partner of Homeland Radiological Services. “Aanko Technologies recognized leadership in Homeland Security make them an ideal partner in expanding our radiological services”.
